

IN HOUSE TRAINING

In providing organizations with taylor-made solutions we develop comprehensive programs with practical applications shaped to fit specific learning needs.

Includes:

- Training Needs analysis and identification.
- Definition of learning objectives.
- Drafting and development of training syllabus.
- Learning assessment - reporting.
- Evaluation and optimization.
- Certification.

Benefits of our in-house training programs:

- Increasing staff capabilities. Training approach develops managing capabilities and efficiency rates. Participant shall use relevant methodologies designed to be better prepared in practical terms.
- Sharing common experiences and its approach evidence immediate impact on the organization.
- Utilisation of real cases and situations in the organization to illustrate exercises, cases and discussions during the course. This enables direct application of acquired skills thereby optimizing results.
- Savings on training investment. Courses represent considerable savings per person as compared to regularly scheduled training courses.
- Planning courses according to corporate time constraints. Times, dates and contents adapted to the most convenient format and arrangements in order to meet learning needs wherever and whenever required.
